TRAVELERS 

**“Of all the forms of inequality, injustice in healthcare is the most shocking and inhumane.”**

It was in March of 1966 that the Reverend Dr. Martin Luther King made this statement. More than 55 years later, the disproportionate impact of the COVID-19 pandemic on communities of color highlights the fact that insufficient progress has been made addressing longstanding healthcare disparities. Since the late 1970’s, when the federal government began stratifying health outcomes by race and ethnicity, healthcare disparities have been noted. These disparities have been characterized as extensive, pervasive, and persistent. In 2002, the Institute of Medicine issued a publication entitled Unequal Care, exploring the contributors to these healthcare disparities, and offering mitigation strategies. Among the recommendations was diversification of the US healthcare workforce. In fact, considering the shifting demographics in America, bringing diversity to the workforce was characterized as being in the nation’s compelling interests.

Nearly 20 years have passed since these publications, yet certain racial and ethnic groups remain underrepresented in the US healthcare workforce. The National Institutes of Health (NIH) defines these populations to include A) individuals from underrepresented racial and ethnic groups, B) individuals with disabilities, and C) individuals from disadvantaged backgrounds. Dr. Joy Howell, who serves as Assistant Dean of Diversity and Student Life of Weill Cornell Medicine believes that “Medical education is a public good and we have a responsibility to cultivate a diverse physician workforce that will deliver outstanding, culturally sensitive care to every segment of our society”. The Travelers Summer Research Fellowship is an enduring and exceptional program that is tangibly advancing this cause.

Identifying potential medical students who have a serious interest in the addressing the healthcare needs of the underserved is critical. We strive to be inclusive and make every effort to include among our medical

student body individuals from underrepresented populations, , students who have had a diverse range of life experiences, and demonstrable engagement in various student organizations addressing minority issues, and students who are deeply committed and prepared to address the healthcare disparities.

The Travelers Summer Research Fellowship Program is designed to provide 25 premedical students meaningful insights into the field of medicine, including experiential research training and enhance their knowledge of the conditions that greatly affect the health of traditionally underserved populations. We welcome applications from talented individuals of all backgrounds, including those from students who are members of underrepresented minority groups, have disabilities, or are from disadvantaged backgrounds Applicants should be in their junior (third) year of college, should have completed two semesters of biology, general chemistry, organic chemistry and one semester of physics and should be declared premedical students. Additionally, applicants must be U.S. citizens or hold a Permanent Resident Visa status.

With the resumption of in-person program in 2022, the program also provides participants with limited opportunities to shadow a physician thereby provide some exposure and insight into the many facets of clinical medicine.

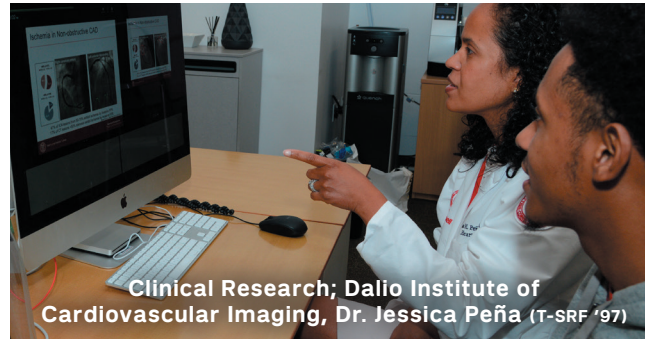

Dr. Howell is a longstanding faculty member at WCM. As committed clinician educator. She served as the Program Director for the Pediatric Critical Care Medicine Fellowship from 2005 through 2020 when she appointed as Assistant Dean of Diversity and Student Life. She is deeply committed to advancing the diversification of the US healthcare workforce.

 Weill Cornell Medicine

**PROGRAM DATES:  
JUNE 17 – AUGUST 2, 2024**

## How to Apply:

1. Go to our website at <https://bit.ly/T-SRF>
2. Download the T-SRF 2024 Application Instructions PDF and follow them ([http://weill.cornell.edu/education/programs/tra\\_sum\\_res.html](http://weill.cornell.edu/education/programs/tra_sum_res.html))

## Program Contents:

- **Experiential basic science or clinical research training, under the supervision of a WCM faculty member, allowing participants to acquire investigative techniques that can be later applied as they pursue their medical education.**
- **Didactic curriculum focused on common public health issues including healthcare for the under and uninsured; healthcare disparities; research basics; and practical information surrounding the medical school application process including financing medical education, and preparation for the MCAT.**
- **Professional Development opportunities including career panel discussions crossing a variety of medical specialties (primary care, pediatrics, psychiatry, neurology, ophthalmology, obstetrics and gynecology, surgery, radiology emergency medicine and internal medicine).**
- **Opportunity to learn from several diversity and admissions deans from NY/NJ medical schools participating in a panel discussion that addresses the question "What are medical schools looking for?"**

*Students receive a \$3,000 cost-of-living allowance and are housed, at no cost, in a medical student dormitory, Olin Hall. Participants are responsible for their meals and other living expenses. Travel expenses are subsidized for students living beyond the NY/NJ/CT tristate area.*

## Questions?

**Joy D. Howell, M.D., FAAP, FCCM**

Professor of Clinical Pediatrics  
Vice Chair for Diversity in Pediatrics  
Assistant Dean of Diversity and Student Life  
Director, Travelers Summer Research Fellowship Program

**APPLICATION DEADLINE:  
FEBRUARY 1, 2024**

## Last summer's fellows came from a wide range of institutions:

Binghamton University, State University Of New York	Middlesex County College
Boston College	New York University
Brooklyn College, City University of New York	Occidental College
City College, City University of New York	Saint Francis College
College Of New Jersey	The Ohio State University
Cornell University	Pomona College
DePauw University	Suffolk University
Emory University	University of Illinois at Urbana/Champaign
Interamerican University of Puerto Rico, Bayamon Campus	University Of Massachusetts at Amherst
Keck Graduate Institute	University Of Puerto Rico at Arecibo
Louisiana State University at Baton Rouge	University of Puerto Rico at Ponce
	Wake Forest University
	Wofford College
